Purpose of the legislation

The purpose of the legislation on Saturnian legal groundwork is to found Saturn as a official state within the 6b6t Minecraft server and the Saturn discord server, this legislation if agreed upon by the owners will create the legal groundwork of a Saturnian state where every trusted member of Saturn would be allowed to create a legislation which would be voted on by the other trusted members. This legislation seeks to organize Saturn in a functioning flexible governing body by founding a groundwork for its members to co-operate and co-govern the group together with the owners.

Introduction to the legislation

This legislation would be introduced as a motion on which the owners of Saturn would vote. If agreed upon this legislation, a channel will be made for the trusted members where the members can propose changes in Saturn where votes will be held. Each owner will have a veto to halt voting while it is ongoing.

Hopes for the future.

The hope of this legislation is to turn Saturn into a more player driven group capable of solving hardships and problems in order for it to grow faster, the more people that help think of ways Saturn could change the more capable Saturn may be too grow.

I. Members voting on Legislations.

Any trusted member of Saturn will be allowed to vote on a Legislation proposed by either the Owners or another trusted member, a trusted member's right to vote on a Legislation could be individually removed when agreed upon by most of the other trusted members.

II. Members creating Legislations.

Any trusted member of Saturn will be allowed to create a Legislation on whatever they might feel that must be changed. There are no criteria on how or in what a Legislation is proposed besides that it must be accessible and let known to the other trusted members so that they may vote on it. For a Legislation to become accepted the vote needs to have a majority by other trusted members. The right to create a Legislation may be revoked when the trusted member is deemed a troll or deliberately sabotaging Saturn.

III. The owner's powers.

The owners can veto any Legislation that does not appeal to them, a veto is only accepted once most of the owners agree that it should be vetoed. If the owner fails to gain more than half of the owners to veto the Legislation the voting on the Legislation continues. The owners are also allowed to vote and create Legislations as they please like the other trusted members. Furthermore, owners can also endorse a Legislation and when most of the owners endorse a Legislation it will be passed regardless of the vote.

IV. Justice system

When abuse of the right to vote, create or veto a Legislation is suspected one may create a Legislation to remove someone's right or powers. The individual of whom this vote is about will not be allowed to vote or veto on this Legislation. A Legislation may also remove someone from Saturn if justified.
